## Introduction

**"Good afternoon, everyone. Thank you for being here today.  
We are here as a candidate to talk about an important problem: poverty.  
In our speech, We will explain our ideas and policies to help people in need.  
Together, we can make our city stronger and give hope to every family."**

## Background

**"In our city, poverty is real and very hard. I know this problem because I lived it. One night, my parents went to bed without food, so my sister and I could eat. This memory is very sad, and it shows why we need change.**

**We must fight poverty and give hope to all families"**

## Proposal

"Our proposal has five main ideas to combat poverty.

1. if we give free courses to young people, they will have more chances to get good jobs.
2. if we were the leaders, we would create a program to give free meals to poor families.
3. if we offer free medical care, people will be healthier and stronger to work.
4. if the city created more jobs, many families would have money to live better.
5. if we help poor families with low-cost houses, they will have a safe place to live."
